

Emergency Operations Center (EOC)

The Emergency Operations Center (EOC) training provides valuable information on proven EOC techniques for a reliable primary or back-up EOC system. Our unique learning format consists of lecture and hands-on experiences in our state-of-the-art campus facilities.

This training will benefit members of:

- Government
 - County, city, municipal
 - Military
- Educational Institutions
- Private Industry

The EOC serves as a centralized management center for emergency operations. Here, decisions are made by your staff based upon information provided by the Incident Commander and other personnel. Regardless of size or process, every facility should designate an area where decision makers can gather during an emergency.

The EOC training will help you locate your EOC, both primary and alternate, identify communications equipment, select reference materials and activity logs, and determine other tools necessary to respond quickly and appropriately to an emergency. The instructor has many years of experience in the emergency management field and is here to help you be successful.

EOC Resources Available:

- Communications equipment
- A copy of the emergency management plan and EOC procedures
- Blueprints, maps, status boards
- A list of EOC personnel and descriptions of their duties
- Technical information and data for advising responders
- Building security system information
- Information and data management capabilities
- Telephone directories
- Backup power, communications and lighting
- Emergency supplies

For more information about the training or to schedule time for your group to experience this excellent learning environment contact Brian Lilyquist, Training Director, at 920-693-1212 or call toll-free 1-888-468-5682 Extension 1212 or email Brian at brian.lilyquist@gotoltc.edu.
